“Institute of Palliative Care” First of it’s kind in Pakistan

Twenty three (23) acres of land have been acquired for Cancer Care Hospital at a cost of Rs. 200 Million at Raiwind Road Lahore. “Progressive Consultants” have designed the Hospital. The total cost of this 400 bedded Cancer Hospital is about Rs. 9 Billion and will be completed in 3-5 years. This will be a state of the art Cancer Hospital and will provide free of cost treatment. Thanks to Lahore MJF Lions Club, banks, businessmen, students and families of cancer patients for their continuous support and funding. We are now well over half the way to Rs. 900 Million required for completion of “Institute of Palliative Care.” By December 2016, a 100 bedded Institute of Palliative Care will be completed and will become functional in Feb 2017.

“We will always be thankful to our respected donors for their donations”

Every ‘Cent’ is vital for our project and is welcome. Your money will make all the difference. Please come forward and donate online at www.cch-rc.com and help us in alleviating this human suffering. Remember 280,000 patients remain without adequate treatment of cancer in Pakistan every year.

Construction of Reception Area of IPC

Construction of Pediatric Palliative Unit

almost a mirror image of first wing**

OUR VISION

A Cancer Hospital where comprehensive care will be provided with compassion and commitment, where no one will be denied treatment on the basis of his/her advanced stage of disease and treatment will be free for all.

- The Cancer Care Hospital & Research Centre will be the largest charitable Cancer Hospital of Pakistan.
- It will provide treatment to patients with both early and advanced stages of cancer.
- This hospital will also provide Palliative Care services - will be the first Hospital Based Palliative Care Unit in Pakistan.
- All patients will be provided free medical treatment in a dignified manner.
- Research will focus on prevention and treatment of cancers prevalent in our community.

OUR MISSION

To provide free of cost quality and comprehensive cancer treatment to all patients meeting their physical, social, economic and spiritual needs and to teach, train and disseminate the latest development in the field of oncology ensuring aggressive research and development of indigenous cancer drugs.

World Cancer Day 2016

Cancer is a global problem and Pakistan is no exception. In countries like Pakistan, the incidence of cancer is increasing because of a variety of factors including tobacco use and lack of healthy life style. Pakistan now has an estimated population of over 200 million and an estimated new cancer patient load exceeding 340,000 per year. Remember 280,000 patients remain without adequate treatment in Pakistan every year.

Prof. Dr. Shaharyar Educating Students How to take measures for Prevention of Cancer

Dr. Shaharyar promotes Healthy Life style among students of different universities and colleges by regularly holding seminars. He warns against tobacco addiction and encourages boys and girls to perform regular exercise for 150 minutes per week. He recommends 30 minutes of brisk walk every day for five days a week. He also emphasizes the need for annual mammography screening for women above 40 years of age.
