“Cancer Care Hospital & Research Center”

Cancer Burden in Pakistan

Fact Sheet

- ▶ Every year 340000 people suffer from cancer in Pakistan.
- ▶ Only 71600 patients get adequate treatment and a vast majority of cancer patients remain untreated.
- ▶ Around 400 cancer patients die every day due to the lack of adequate treatment.
- ▶ One cancer patient dies every 4 minute, un-helped & un-treated.

Wake Up & Join Us

Our Mission

To provide free of cost quality and comprehensive cancer treatment to all patients meeting their physical, social, economic and spiritual needs and to teach, train and disseminate the latest developments in the field of oncology ensuring aggressive research and development of indigenous anti-cancer drugs.

Your donation will support our mission to provide free treatment to cancer patients.

Our Vision

To establish a cancer hospital where free of cost comprehensive & professional care is provided with compassion and commitment. A hospital where no patient is denied treatment on the basis of advanced stage of disease. A hospital which conducts research with the promise of winning war against cancer.

Tough times don't last, tough teams do.
Board members meeting at Cancer Care Hospital & Research Center project office.

CANCER CARE HOSPITAL & RESEARCH CENTER, RAIWIND ROAD, LAHORE

PHASE 1

(A) PALLIATIVE CARE:

A 120 bedded indoor palliative care facility is being established that will be supported by diagnostic lab, radiology unit and transfusion facility. There will be customized wards and rooms for patients for individualized care. CCH-RC will provide palliative care focusing on relief of suffering and support for the best quality of life. It will provide sophisticated management of pain. It will also offer psychosocial, spiritual and bereavement support.

(B) RADIATION BLOCK

Majority of cancer patients need some type of radiation therapy during the course of their illness. Presently because of shortage of radiation machines patients have to wait for 5 to 8 months for radiation treatment and during this period many patients die and in others disease progresses. Cancer Care Hospital & Research Center is starting construction of Radiation Block soon. It will provide free of cost radiation therapy to all patients. For this purpose we immediately require 5 radiation machines. Each machine costs \$. 1 million.

Those who (in charity) spend of their goods by night and by day, in secret and in public, have their reward with their Lord: on them shall be no fear, nor shall they grieve. (13) 002.277

Introduction of Chairperson

Prof. Dr. Shaharyar receives “National Human Rights Award “2016”

“Health is a Human Right”

Prof. Dr. Shaharyar has received National Human Rights Award 2016, from Ministry of Human Rights, Government of Pakistan in recognition of his services in the field of Cancer. President of Pakistan, Mamnoon Hussain conferred this award during a ceremony held in Awan-e-sadar Islamabad on 10th of December 2016.

Prof. Dr. Shaharyar is the founder of Cancer Care Hospital, a large charitable 400 bedded hospital, spread over an area of 23 acres which is under construction on Raiwind Road Lahore, **where treatment of cancer will be free of cost and no patient will be refused.** Prof. Dr. Shaharyar strongly advocates that the provision of health care services should be considered a fundamental human right and these should be provided free of cost to every citizen without any discrimination.

Prof. Dr. Shaharyar is a well-known figure in the oncology community of Pakistan. He is known for his dedication and commitment to cancer patients and cancer research. He is a popular teacher of Oncology and Radiobiology and has a teaching experience of 30 years. As a physician he has treated more than 100,000 cancer patients in the last 30 years of his career. He has been honored with various awards and gold medals for his services and cancer research in oncology including lifetime Achievement Award by Pakistan Society of Clinical Oncology, Distinguished Services Award for Cancer Research and Shams uz Zaman Memorial Gold Medal. He is also a co- recipient of Kobayashi Foundation Award 2010, from Japan. He has also contributed in the development of new anti-cancer drugs and has developed new treatment options for breast and ovarian cancer. He has helped many institutions in the development of Hospital Based Tumor Registries for the record keeping of cancer patients and establishment of Ethical Review Boards for the standardization of biomedical research. He regularly conducts Medical Writing Workshops for synopses, dissertations, theses and Protocol Writing.
